Module 2 Lab 3: Textbook Problem 4.4

Temperature Categories

Course: CS 82A - Introduction to Data Science Assignment: Module 2 Lab 3

Temperature Cutoffs

- Cold: Below 15°C
- Warm: From 15°C to 25°C, including both boundaries.
- Hot: Above 25°C.

In [6]:
```
Temperatures = [10,16,23,28,14,22,30]

for temp in Temperatures:
    if temp < 15:
        category = "Cold"
    elif temp <= 25:
        category = "Warm"
    else:
        category = "Hot"

    print(temp, "°C:", category)
```

```
10 °C: Cold
16 °C: Warm
23 °C: Warm
28 °C: Hot
14 °C: Cold
22 °C: Warm
30 °C: Hot
```

In [7]:
```
test_temps = [14,15,25,26]

for temp in test_temps:
    if temp < 15:
        category = "Cold"
    elif temp <= 25:
        category = "Warm"
    else:
        category = "Hot"

    print (temp,"°C:", category )
```

```
14 °C: Cold
15 °C: Warm
25 °C: Warm
26 °C: Hot
```

AI Use Appendix

I used ChatGPT to help translate and explain the assignment instructions from English into Burmese because Burmese is my mother tongue. This helped me understand what the assignment was asking me to do and follow the steps to complete my work.
